POCKETSMART AI: BUDGET & RECOMMENDATION ASSISTANT

1. ABSTRACT

PocketSmart AI is an intelligent budget allocation and product recommendation web application built with Streamlit and Gemini AI. It provides customized financial and shopping plans across Home Interiors, Party Events, and Jewelry purchases.

2. PROBLEM STATEMENT

Planning event or purchase budgets often leads to overspending due to lack of structured estimates and personalized product suggestions. PocketSmart AI solves this by dynamically calculating itemized budget splits based on user parameters.

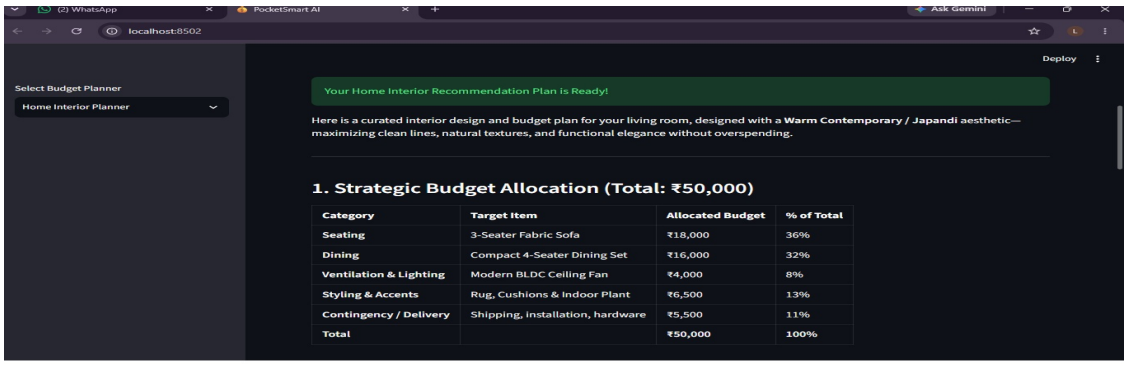

3. KEY MODULES & TECH STACK

* **Home Interior Planner:** Room-wise budget allocation & item recommendations.
* **Party Budget Planner:** Guest count & event based expense distribution.
* **Jewelry Planner:** Metal preference and occasion based budget guide.
* **Tech Stack:** Python 3.12, Streamlit UI, Google Gemini API (google-generativeai), ReportLab.

4. PROJECT SCREENSHOTS & PROOF OF WORK
